BLADE V9 TECHNOLOGIES

STABLEFEEL = MORE STABILITY, FEEL, CONTROL = **SHARPER BLADE**

STABLEFEEL

The new Blade technology, provides an enhanced, firmer feel that increases stability and creates a more connected-to-the-ball feel. Designed with avid players in mind, the result is a “sharper Blade”, making it ideal for those seeking to improve and win.

FORTYFIVE®

Patent-protected frame layup produces more connected-to-the-ball feel while better complementing the more modern, vertical swing path. Material increases both flexibility and stability without compromise through the swing.

DIRECTCONNECT

Carbon fiber handle extends to directly connect with end cap for improved feel and enhanced torsional stability.

GRAPHITE + BASALT

Elastic and reactive material combination improves the flex of a racket to increase ball contact with the strings for enhanced feel and greater control.

PARALLEL DRILLING

Grommet construction provides a consistent, more forgiving string bed response while dramatically increasing the sweet spot.
